#### Personalized Support

mymobility<sup>®</sup> is a care management system that uses Apple Watch to help you and your care team deliver exceptional pre- and postoperative experiences to qualified patients.

- Procedure-specific protocols are delivered directly to patients, and reminder notifications help to keep them on track
- Encrypted messaging allows surgeons and care teams to easily connect with patients throughout pre- and postoperative activities
- Timely, easy to follow education available in-app reduces the traditional overload of paper process

# Transform the patient experience.

by 🕖 ZIMMER BIOMET

#### Consistently Manage the Full Episode of Care

mymobility and Apple Watch work together to keep patients engaged in their surgical journey, allowing patients to better understand their condition and take an active role in optimizing their surgical experience.

- Procedure-specific protocols
- Timely education

- Pre- and post-op video guided exercise tutorials
- To-do list and reminder notifications
- Encrypted in-app messaging

# Your data. Your guidance. Your outcome. mymobility®

Zimmer Biomet and Apple have teamed up to set a new standard in digital health. This digital platform uses iPhone and Apple Watch to create a new, first-of-its-kind, level of connection between patients and their surgeons, delivering continuous data and patient-reported feedback to facilitate care, outcomes, and satisfaction.

### **Collect and Monitor Objective Data**

- Platform for patient management and passive data collection through Apple Watch
- Provides clinical and operational insights to support the patient's surgical preparation and recovery
- Tracks patient progress through remote monitoring, PROMs collection, engagement, and adherence

## Support Patient Satisfaction

- mymobility introduces an additional layer of connectivity with the ability to support patients outside the surgical event through consistent care processes and direct messaging
- Surgeons and care teams are able to identify patients that require additional instructions while also providing encouragement

#### **Differentiates Surgical Practice**

- Builds brand equity through use of latest technology to assess patient outcomes and satisfaction
- Enhanced communication aims to maximize patient participation and support their recovery process
- Supports patients outside of the surgical event to help reduce variability of care and minimize unnecessary office visits.\*\*
