

N-Force Fixation System®

Product Brochure

The first augmented fixation system, integrating fenestrated screws and a Bone Substitute Material (BSM) into a single construct to provide metaphyseal bone void fill and structural support to the screw.

The N-Force Fixation System is comprised of fenestrated screws, washers and N-Force Blue Bone Substitute Material (BSM). N-Force Blue is injected directly into the fenestrated screw with the use of a sheath to help minimize BSM leakage into the soft tissues.

Not only do the N-Force screws provide fixation, the screws act like a delivery system for filling a bone void. Because defects are filled after reduction, the screw can be placed precisely in the desired location.

N-Force Blue is the only FDA cleared BSM that is validated for use with the N-Force Fixation System. Zimmer Biomet recommends that N-Force Blue be used with the N-Force Fixation System.

4.0 mm

- 1 Proprietary Injection Sheath
- 2 Headless Screw Design
- 3 Reverse Cutting Flutes
- 4 Partially Cannulated Design
- 5 Helical Groove
- 6 Titanium Alloy (Ti-6Al-4V)
- 7 Self-Tapping
- 8 Fully Cannulated Design
- 9 4.0 mm Inset Washer

7.3 mm

- 10 Proprietary Injection Sheath
- 11 Non-Fenestrated Design
- 12 Titanium Alloy (Ti-6Al-4V)
- 13 Fenestrated Design
- 14 Reverse Cutting Flutes
- 15 Helical Groove
- 16 Self-Tapping
- 17 7.3 mm Standard & Inset Washers

INDICATIONS

The N-Force Fixation System is intended for the fixation of bone fractures and bone reconstructions. When used for these indications, the N-Force Fixation System can also be used to deliver injectable bone substitute materials to a surgical site.
